Published on Jan 12, 2018
(Fri.) Heavy rain cells decimated Montecito CA on January 9. Between 4" - 5.5" of rain fell on the seaside town in the early morning hours of the 9th causing a flash flood slurry of mud, giant boulders, tree trunks, cars and splintered homes - much like the tsunami videos of the Japan earthquake on Mar 11, 2011. The devastation is staggering - and there is a YouTube channel: Tony's-24/7Eyes which has documented this disaster and has multiple unedited network videos shot from a helicopter. The nightly news clips don't begin to show the extent of the damage from the flash flood.

The terrorists contronllng our weather have blood on their hands. 17 people have so far been found dead and 40 more are still missing in Montecito. The nearby Ojai NEXRAD microwave doppler transmitter could have and SHOULD have broken up the yellow / red rain cells parked over the Santa Barbara / Montecito burn areas in the early morning hours of the 9th. And again, notice the nicely tailored 120 degree angle in the screen-shot of the Oroville Dam area on the 8th and how that NEXRAD microwave doppler (KHNX) maintained light rain conditions to the NW while dam repairs continue in that area - evidenced by the much lighter green area then the surrounding rainfall which is a darker green.

How long do you think the weather futures gambling racket would last (see: www.Artemis.bm) if we had true satellite weather forecasts on television? The answer is not very long. How long would the mainstream media's narrative of CO2 and smokestack emissions causing this 'crazy' weather hold up if those right angles and high pressure blockades were shown to the TV viewing public on those NOAA satellite maps? Again the answer is not long. Observant people would figure out quick what is going on. The mainstream media is owned by 6 corporations and nearly all of that news dealing with weather, economics and foreign policy is fake-news propaganda.

Chemical desiccant 'chemtrail' haze sprayed over Southern CA today has reduced the Relative Humidity to 32% from the low 60s in about 90 minutes.

San Diego, obscene massive chem-trails in form of an N toward the southeast. Followed by daggers going down toward the earth, and x shapes, and horizontal layers obscuring the sky. Ugly.

Honest weather reports LOL we have to deal with lies from weather reporters daily for years, they sold out and nothing being done to them in any way ??????? I think If you question their report your pc poss will die in hours ! Treason is a death penalty crime and weather used on USA soil as a weapon is Treason , those that help or support the use of

The transmitter south of Poway is always turned up during rain events. I have seen this several times on my phone weather radar. There is a circle around it with no rain, just south of Scripps Pkwy

The nefarious plan is so glaringly obvious! First, create a firestorm to burn out huge swaths of homes and land, allow it get good and dry, then bring huge rain all at once to literally flood out the remains. Wonder what plans the deep state has for this area area??

Thanks 1PR The chemicals put into the spraying are also absorbed into the human body -not forgetting all other life forms on the planet. We are all walking antennae for whatever frequencies are transmitted. The scientists today are the Black Magicians of yesterday

Cloud seeding? Can you not seed/heat certain areas to kill a storm/system as you demonstrate so often? Or couldn't you seed certain areas to create or intensify a storm?
